Department of Public Works
Capital Improvement Projects

SUBJECT: REFERENCE LETTER

To whom it may concern,

My name is James Loomis and I am an Associate Engineer for the City of Vacaville, Public Works Department, Engineering Services. My primary job at the City is the preparation of construction documents for public bidding of Capital Improvement Projects. I had the opportunity to work with Mike DeRousse and Conco West, Inc. on the Well #16 project. The project, construction of a water production well facility, included site preparation, construction of a pump building, placement of the pumps, installation and programming of the control systems and commissioning of the facility. Overall, the project went very well and as with any large project there were some glitches, not attributable to Conco West's work. I appreciated the fact that as issues arose, Mr. DeRousse would apprise us of the problem and present some alternative solutions. Mike's experience and willingness to work with the City was crucial in the successful completion of the project. I look forward to working with Mike in the future and have no problem recommending him for work.

If you have additional questions, please feel free to contact me at (707) 449-5190.

Sincerely,

JAMES D. LOOMIS, P.E.
Associate Engineer
